✓ Documentation dekhna is a good thing

Radio buttons ka group

Programming L →

```
<input type="radio"> C++
<input type="radio"> Java
<br>
<input type="radio"> HTML
<input type="radio"> Python
```

Group them to make sure they all know ki inmein se ek hi select hoga?

By giving them same value for name attribute

Group

```
<input type="radio" name="programming"> C++
<input type="radio" name="programming"> Java
<br>
<input type="radio" name="programming"> HTML
<input type="radio" name="programming"> Python
```

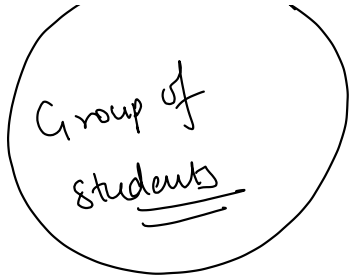
(#) Rollnumber: Unique (ID) id

Classname: WebDev Batch class

~ Element Selector

↳ h1 → All h1's

div → All the div's



ul] →

Specificity / Priority

Increasing

Element Selector → Class → Id → Inline
