'*' → Universal selector
(Sabhi elements ki baat ho rahi hai)

 → Inline element (They take the space that they need)

div → block element
margin / padding works
view port

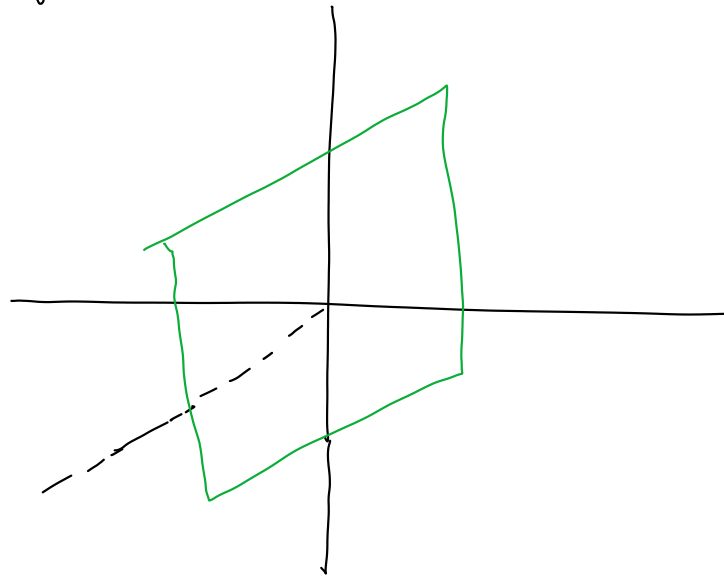

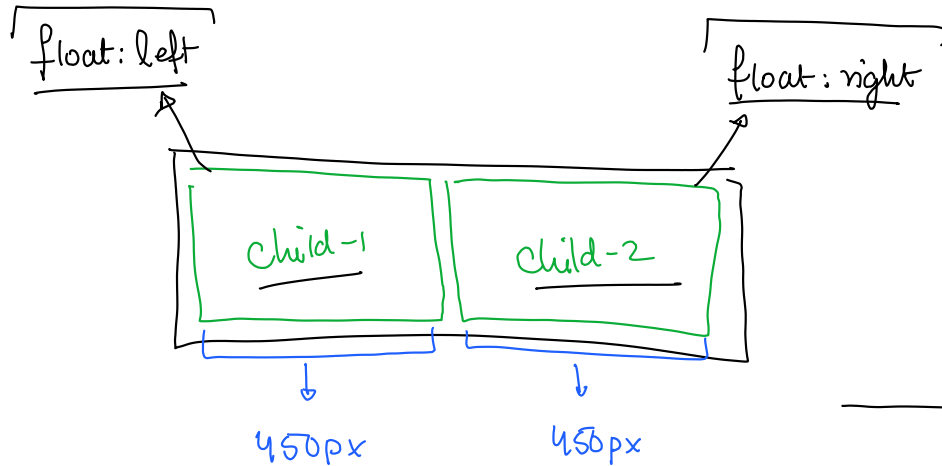

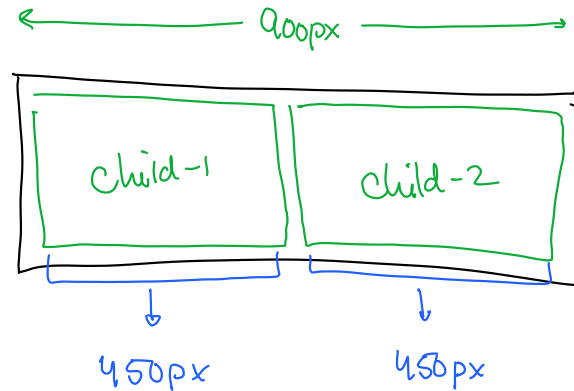

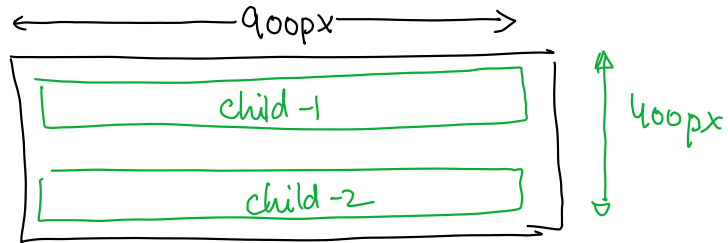

{ Floats }

Units \rightarrow [px] \rightarrow smallest unit

1920 * 1080 (px)

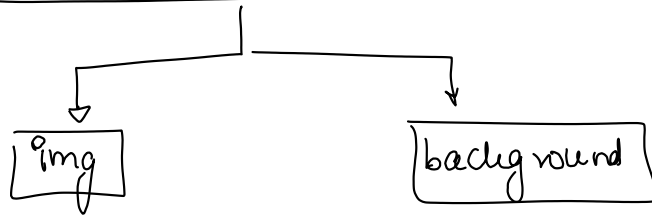

%age \rightarrow works wrt parent

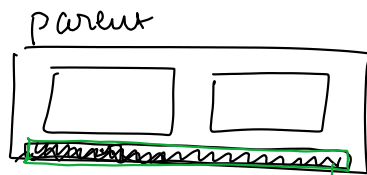

! r.lection in

Must with float

Images ko use karne ke tareeke

float → clearfix

`.clearfix`
`clear: both;` ↔ `<div class="clearfix"> </div>`

Manually add a div

pseudoElement

`.parent::after {`
`Content: ""`

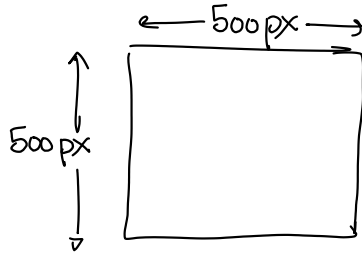

}

Adding Images → ``

⊕ Jaha par height & width is fin & hume waha image add karni
ho toh kya karey?

<div> </div>

```
div {  
    height: 500px;  
    width: 500px;  
}
```
